

Cheaper Cars Now Cost as Much as the Hudson

Price advances of cars which sold at \$1200 to \$1400 increase the preference for the Hudson Super-Six. Its price, too, must soon advance.

Former cheaper cars now cost about as much as a Hudson Super-Six. That is because of the headlong increase in material costs. Some materials are almost double the costs of last year. The Hudson Super-Sixes now built are from materials contracted last year. Since then other companies, having exhausted their supplies, have had to buy in the present market. That accounts for their price increases. When Hudson materials are exhausted, then the Hudson price, too, must go up. The Super-Six was the choice against other cars when its price was \$200 to \$300 above them. That was shown by its sales. Almost 40,000 cars were sold, which is more than the total sales of any

two of the cars which now have advanced up to about Hudson price.

Now that there is no difference in price, all will prefer the Hudson Super-Six. It will be compared with no other car. No other car has shown its records for performance and endurance. No other car has proved so popular. Today you can buy a phaeton, seven-passenger model, for \$1650. Other models compared to similar types of other cars are equally as favorably priced. But to take advantage of these present prices you must act promptly.

When the present supply of materials is exhausted, the price must be advanced. It will then be influenced by the present higher material costs.

Entered at the Postoffice, Bennington, Vermont, Dec. 11, 1903, as Second Class Matter.

FRANK E. HOWE, Editor and Pub.

Wednesday, October 3, 1917.

Bennington raised its quota for the war camp library fund and a little more, just for good measure. If the other towns have done as well Vermont's \$20,000 will be all subscribed. Now that the library fund is taken care of locally the Liberty bond sale is in order. One penalty of having a good reputation is the responsibility of living up to it. Bennington has the reputation and is not yet ready to lay down and quit.

Bennington county's second contingent under the selective enrollment left this morning for their military training at Camp Devens. It was a fine appearing body of young men and one which will prove a credit to the county and the state of Vermont. Each group as it leaves seems to touch the public heart a little deeper. The reason, of course, is that it enlarges the number of those who have sons and brothers in the army, and as the circle grows the sentiment becomes more general. As these boys leave, the report comes, through roundabout and unofficial channels that the first of the Vermont soldiers—those a part of the regiment have reached the other side of the ocean safely and will at once begin intensive training in either France or England. Vermont now has upwards of five thousand men in the army and the total is perhaps nearer six thousand.

MANY DROPPED FROM ARMY
Pro-Germans Quietly Weeded out of Regulars' Ranks and the Navy.

New York, Oct. 3.—About 25 soldiers of the regular army, who at the beginning of the war with Germany were on duty at posts in and near New York city, have been quietly dropped as a result of investigations as to their loyalty. They were not dropped as "spies," but simply because they were of German origin and of known German sympathies in the present war.

The above information comes from a source of unquestioned authority, and the number of German soldiers refers only to this particular section of the country. Many other soldiers, it is understood, have been quietly discharged from the army in other parts of the country.

Some of the soldiers who are now no longer in the service held non-commissioned positions, and in a few cases came forward of their own accord and frankly stated that their sympathies were in Germany and that they would resent having to go to Europe to fight against men of their fatherland. In every instance, it was said, these men were discharged from the army and all are now pursuing unhampered, so far as is known, other vocations in civil life.

As to the situation in the army, it can be stated that the number dropped is not nearly so large as is the case in the navy. This is due to the splendid efficiency of the navy's own intelligence service which weeks before war was declared began a round-up of the men whose services in time of war the navy did not desire. When war was declared practically every man whom the navy had reason to distrust had already been dropped from the service.

CLEARING A POND

Attempt to Exterminate Bass in Marlboro South Pond

County Warden E. H. Metcalf and two representatives of the Connecticut department of fisheries spent two days last week in dragging a seine through the waters of Marlboro South Pond in search of black bass, permission to do this having been granted by the Vermont department in pursuance of the policy to make this pond exclusively trout waters. The result of the efforts of Warden Metcalf and his visitors was the capture of one small sucker and a few shiners, but no bass. While Mr. Metcalf is convinced that there are comparatively few bass in the pond, the seine in which he assisted was not conclusive for the reason that the nets used were only deep enough to make possible dragging the water around the shores. In fact, it was impossible with the equipment which the Connecticut men brought with them

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

to operate in water deeper than four or five feet. Soundings were made in various parts of the pond, the greatest depth found being 38 feet.

Under existing conditions there is no substitute for war, but if the present pressure upon the world's militaristic elements shall not produce one then the world cataclysm will have been in vain.
